

Identity theft protection and a whole lot more

Identity Theft Protection

Our proprietary technology monitors[†] for fraudulent use of employees' Social Insurance Number, name, address, and date of birth in applications for credit and services. The patented system sends alerts by text, phone^{‡‡}, email or mobile app when a potential threat is detected.

Device Security

Multi-layered, advanced security helps protect devices against existing and emerging malware threats, including ransomware, and helps protect private and financial information when employees go online.**

Online Privacy

Protect devices on vulnerable connections through bank-grade encryption to keep information private. We also scan common public people-search websites for employees' info and help them opt-out.***

Streamlined Member Dashboard

We help safeguard your identity, privacy, and security with our easy-to-use, convenient solution.
